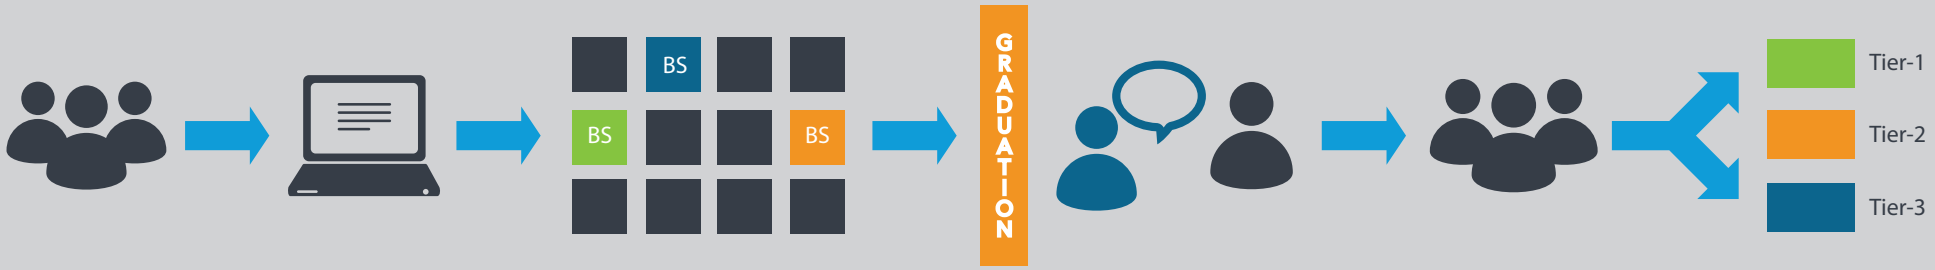
## Community Business Academy



Potential applicants attend an information session to find out more about the program. They then go online to apply.

The Community Business Academy offers 12 weeks of training in effective business management. Cohorts typically consist of 15-20 members. Business Simulations are run at 3 different times throughout the 12 weeks. The simulations offer practice in operating a business in a simulated marketplace environment.

Each graduate is asked to complete an exit interview and go through a post-assessment. We then have an internal process by which we tier graduates based on their probability to achieve key business outcomes.

## Business Acceleration Services

Each individual is given a **Strategic Action Plan** that outlines key goals to work on over the next 6-12 months.

Everyone has the option to receive coaching in order to help them achieve their outlined business goals.

Workshops are held regularly on different topics to help participants in areas such as finance, credit-building, legal matters, and more.

### Mentors

Mentors are business and marketplace professionals who work closely with our coaches on positioning our clients for success. They can offer strategic advice, help with networking, or assist with leading workshops. They typically have extensive industry knowledge and insight that can help our entrepreneurs gain a foothold in the marketplace.

### What's your skill?

SALES | "BIG-BOX" RETAIL | E-COMMERCE | WEB DESIGN

### Become a mentor

We have dozens of entrepreneurs each with great business potential ready for your expertise. Interested in mentoring? Please contact us or go online to complete a volunteer form.
